## PARCEL POST RATES

On Seeds, Plants, Bulbs, Roots, Books, Tools, etc., within the U. S. and Possessions.

	<i>First Pound or Fraction</i>	<i>Each Additional Pound or Fraction</i>
Local .....	7c.	1c (2 lbs.)
First and Second Zone within 150 miles of either.....	8c.	1.1c
Third Zone within 150 to 300 miles .....	9c.	2c
Fourth Zone within 300 to 600 miles .....	10c.	3.5c
Fifth Zone within 600 to 1000 miles.....	11c.	5.3c
Sixth Zone within 1000 to 1400 miles .....	12c.	7c
Seventh Zone within 1400 to 1800 miles.....	14c.	9c
Eighth Zone all over 1800 miles.....	15c.	11c
Canada .....	14c.	14c

NOTE—A fraction of a cent in the total amount of postage on any parcel shall be counted as a full cent. Limit of weight for delivery to all zones 70 pounds; to Canada 15 lbs. If weight exceeds this, we will pack in 2 or 3 parcels (not more) provided money is remitted to cover postage. (Mark your Zone Number on order.)

All parcels under 8 ounces are carried everywhere regardless of zone rates at one and one-half cents for 2 ounces.

Low Prices.—A matter of primary importance in buying seeds is to obtain only the best. Our position enables us to supply you with such seeds, and at prices to compete with all reliable seedsmen.

Good Order.—If seeds are not received in good order within a reasonable time, write us and we will look up the shipment. Small orders are often delayed in transit.

Cash.—Money must always accompany the order. Money may be sent safely either by Postoffice Order, Express Order, or Bank Draft. We will be responsible for the safe receipt of remittances sent by either of the above methods. We accept postage stamps the same as cash.

## WARRANTY AND QUALITY OF SEEDS

While we exercise the greatest care to have all our seeds Pure, Reliable, and True to Name, we do not give any warranty, express or implied, as to description, quality, and productiveness, or any other matter, of any seeds we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the seeds on these terms, they are at once to be returned and the money that has been paid for same will be refunded.

## SPECIAL USES OF FLOWERS

### For Cut Flowers

Antirrhinum	Coreopsis	Larkspur	Pyrethrum	Roseum
Aster	Dianthus	Marigold	Salpiglossis	
Calendula	Didiscus	Mignonette	Scabiosa	
Calliopsis	Gaillardia	Nasturtium	Stocks	
Candytuft	Gomphrena	Pentstemon	Sweet Peas	
Carnation	Gypsophila	Petunia	Verbena	
Centaurea	Helichrysum	Phlox	Zinnia	
Chrysanthemum				

### Annuals that do well in a slightly moist soil

Calendula	Linum	Marvel of Peru	Ricinus
Larkspur	Marigold	Mignonette	

### Annuals which withstand drought

Ageratum	Cosmos	Hollyhock	Scabiosa
Alyssum	Cynoglossum	Marigold	Statice
Calliopsis	Dianthus	Marvel of Peru	Verbena
Candytuft	Euphorbia	Petunia	Vinca
Centaurea	Gaillardia	Portulaca	Zinnia
Coreopsis			

### Plants for Hanging Baskets, etc.

Ageratum	Lantana	Petunia	Thunbergia
Coleus	Lobelia	Portulaca	Verbena
Geranium	Nasturtium		

### Flowers for Winter Bouquets (Dried Flowers)

Ceolsia Cristata	Gypsophila	Lunaria	Statice
Gomphrena	Helichrysum	Physalis	

### Dwarf Edging Plants

Ageratum	Lobelia	Nasturtium (Dwarf)	Verbena Compacta
Alyssum	Marigold (French)	Pansy	Viola
Bellis	Myosotis	Portulaca	

### Rapid Growing Annual Vines

Balsam Apple and Pear	Cypress Vine	Morning Glory	Sweet Peas
Cardinal Climber	Gourds	Nasturtium (Tall)	Wild Cucumber
Cobea	Ipomea	Scarlet Runner	

### Annuals for Fragrance

Alyssum	Heliotrope	Petunia	Sweet Peas
Candytuft	Mignonette	Scabiosa	Sweet William
Carnation	Nasturtium (Gleam)	Stocks	Wallflower
Centaurea	Nicotiana		

### Annuals for Poor Soil

Alyssum	Cosmos	Nasturtium	Statice
Antirrhinum	Euphorbia	Portulaca	Verbena
Celosia	Kochia		

### For Semi Shade

Aquilegia	Centaurea	Myosotis	Sweet William
Bellis perennis	Coleus	Pansy	
Campanula	Lupin		

### For Rock Gardens, Annuals

Alyssum	Lobelia	Portulaca	Verbena
Nasturtium Dwarf Gleam	Phlox drummondi	Thunbergia	

### For Rock Gardens, Perennials

Alyssum saxatile	Bellis perennis	Linum	Myosotis
Aquilegia	Dianthus	Matricaria	Viola

ASPARAGUS.

An ounce of seed will sow 50 feet of drill, and produce about 300 plants.  
Fair crops may be expected the third year from seed.

	Oz.	¼ lb.	Lb.
Washington, Martha ..... The original rust resistant variety; heavy yielding, large dark green stalks; of fine quality.	.15	.35	1.25
Washington, Mary ..... The highest type of the rust-resistant asparagus. It is earlier, larger and longer than the original Washington and quite as resistant. Tips are very tight and do not "sprangle out" or "blow" prematurely.	.15	.35	1.25

BEANS.—Dwarf or Bush.

Postage on all Beans to be paid by purchaser. See Parcel Post Rates  
Front Page.

Beans should not be planted before the ground becomes light and warm, in favorable seasons usually about the first of May. The soil should be rich and mellow, and the seeds scattered about 3 inches apart in drills that are to 2 to 2½ feet apart, and covered about 2 inches deep. Successive sowings, made at intervals of about two weeks until the middle of July, will give a plentiful supply of beans throughout the season. One pound of seed will sow 100 feet of drill.

GREEN PODDED SORTS

WAX PODDED BEANS.

	Lb.	¼ Bu.	Days
German Black Wax, Yellow Pod .....	.40	4.00	55
Improved Golden Wax, Yellow Pod .....	.40	4.00	51

POLE BEANS.

Less hardy than the Bush Beans, and should be planted several weeks later, when the ground is warmer. Plant the seeds in slightly raised hills 3 or 4 feet apart, 4 or 5 seeds to the hill. The Limas are especially tender, and the rule for late outside planting with them is rigid. Painstaking cultivators, who are usually the most successful, plant them eye downward, after setting stout poles for every hill. All sorts of late-ripening Pole Beans are benefitted by pinching the tips of the vines back when they are about 5 feet high. A pound will plant about 100 hills.

	Lb.	¼ Bu.	Days
Early Golden Cluster Wax, Yellow Pod.....	.40	4.00	74

Henderson's Bush Lima, Small Oval Bean.....	.40	4.00	15.00	65
Speckled, Small Flat Bean .....	.40	4.00	15.00	73

## BEETS.

The soil best suited to the Beet is a deep, light and rich loam. For very early crops, the seed is sown in hotbeds, and the seedlings are transplanted to the open ground. For main crop, the seed is sown outside as soon as the soil is in good condition, in drills from 12 to 15 inches apart, and covered about an inch deep; the plants are thinned to stand 4 or 5 inches apart in the rows. For winter crops, sow seeds in June, in drills, as for early Beets. An ounce of seed will sow 100 feet of drill; five or six pounds will sow an acre.

	Oz.	$\frac{1}{4}$ lb.	Lb.	Days
Asgrow Wonder, (New Dark Red) round deep red root.....	.25	.50	1.50	57
Early Blood Turnip, bright red turnip root .....	.25	.50	1.50	68

True Sugar, long white root .....	.25	.50	1.50	102
Yellow Globe, Stock .....	.25	.50	1.50	102

## BROCCOLI.

	Oz.	4 Oz.
Italian Green Sprouting .....	.50	1.50

A distinct variety, extensively cultivated by Italian gardeners. Plant forms a large, solid head which remains green. When the central head is cut, numerous sprouts develop from the leaf axes, each sprout terminating in small green heads, which are bunched for market.

## BRUSSELS SPROUTS.

	Oz.	4 Oz.
Dwarf Improved .....	.50	1.50

Species of Cabbage; cultivation the same.

CABBAGE.

Seed sown in hotbed or greenhouse about February 15 will give plants large enough to transplant into hotbeds about March 10. Set them 2 or 3 inches apart each way, and as soon as they become well established remove the glass for part of the day, to harden them for final transplanting into the open ground, increasing the exposure daily until April 10 or 20, when the final transplanting may be made. Plants for this early crop need not stand further apart than 1½x2 feet. For late crops, sow seeds in April or May, and transplant to the open ground when large enough, setting the plants up to the first leaf, and 2x3 feet apart. It is important that the plants should not stand thick in the seed-beds, as this would induce weak, slender plants.

One oz. to 1500 plants; 2 oz. to the acre.

	Oz.	Days
All Head Early, early flat head .....	.50	78
All Seasons, medium early round head. Yellow-resistant.....	.50	87
Charleston Wakefield, early peaked head .....	.50	74

Selected Flat Dutch, late .....	.50	100
Surehead, late flat head .....	.50	77
Wisconsin Hollander, early round head. Yellow-resistant.....	.50	105

CARROT.

Carrots succeed best on heavy loam, which preferably should have been well fertilized the previous year, as fresh manure often causes the roots to grow pronged and misshapen. Sow the seed as early in the spring as the ground can be prepared, firming the soil down over them.

One ounce of seed will sow 200 feet of drill: 2 pounds will sow an acre.

	Oz.	¼ lb.	Lb.	Days
Chantenay Half Long (The Model) .....	.25	.75	2.00	72
Excellent medium early half-long stump rooted variety; roots about 6 inches long, very thick, smooth and of a deep orange-red color.				
Danver's Half Long .....	.25	.75	2.00	72
Good for all purposes.				
Long Orange .....	.25	.75	2.00	88
Large; good for stock, also.				
Nantes Improved Coreless .....	.25	.75	2.00	70
Reddish orange, blunt end root.				
Oxhart .....	.25	.75	2.00	72
Roots short and very thick.				

CAULIFLOWER.

Culture for Cauliflower and cabbages is essentially the same, but to the former extra care given in applying fertilizers and moisture well repays the gardener. Sow the seeds for early and late crops as directed for cabbage, but do not set the early plants in the open field too soon, for if too much stunted by severe frosts they begin to form heads before they are strong enough to develop them well. Plants which have not headed before winter sets in may be stored in a cool cellar or coldframe, and will form heads there without any further attention.

One oz. to 1500 plants; 2 oz. to the acre.

	Pkt.	¼ Oz.	½ Oz.
Early Snowball, Dwarf .....	.10	.75	1.50

CELERIAC.

Sow in early spring; transplant the seedlings in May. They will be ready for cooking in October and may be preserved in dry sand for use during winter.

	Oz.
Turnip Rooted Celery, used for celery flavor in soups.....	.50

CELERY.

Celery can be grown on any garden soil, but is finest on deep, mellow bottom land. Seed for early crops should be sown in hotbeds about March 15. The plants may either be thinned to give them room to grow, or transplanted to another bed to grow until it is time to plant them in the open ground. For main crop, seed should be sown in the open air as soon as the soil and air are warm enough. They should be covered lightly, or merely pressed into the earth with a board if the soil is fine and mellow. The seedbed must be kept free from weeds and well watered in dry weather. When the plants are large enough, transplant them to shallow trenches or furrows from 4 to 6 feet apart, according to the variety grown, setting the plants 6 inches apart in the rows and pressing the soil firmly around them. One oz. to 10,000 plants.

	Oz.
Celery Cabbage or Chinese Lettuce.	
Wong Bok, short variety .....	.50
Chihili, tall variety .....	.50
Giant Pascal, green garden variety .....	.50
Golden Self Blanching, gold garden variety .....	.50
White Plume, white garden variety .....	.50

COLLARDS.

	Oz.
True Georgia .....	.25
Used as Greens. A non-heading type of cabbage.	

SWEET CORN.

Postage to be Paid by Purchaser. See Parcel Post Rates on Front Page.

The Sweet or Sugar varieties being liable to rot in the cold or wet ground, should not be planted before May, or until the ground has become warm, and for a succession continue planting every two weeks, until the middle of July, in rich, well-manured ground in hills three feet apart each way, covering about half an inch and then thin out three plants to a hill, or plant in rows four feet apart and to stand eight inches apart in the rows. One-quarter pound to 100 feet; 1 gallon to the acre.

	Lb.	¼ Bu.	Bu.	Days
Adam's Early, ears 12-14 rowed, white .....	.30	2.50	8.00	72

CORN SALAD.

Sow the seed thickly in shallow drills in September, and firm the soil well down above it, if the weather be dry. Highly appreciated, and much grown where other salads and lettuces do not succeed. An ounce of seed will sow a bed 20 feet square.

	Oz.	¼ Lb.
Large Leaf .....	.50	1.50
Fine for salad.		

CRESS.

	Oz.
Curled or Pepper Grass .....	.35
Used for salad; very pungent.	
True Water Cress .....	.50
Delicious flavor; very wholesome.	

CUCUMBERS.

The seed can not be planted in the open ground before the weather has become warm and settled, and the ground mellow and light. Plant the seeds in well-enriched hills about 4 feet apart each way, and as soon as all danger from insects is over thin the plants to leave four of the strongest in each hill. One oz. to 50 hills; 1 pound to the acre.

	Oz.	¼ lb.	Lb.	Days

White Wonder, white, large, clustered .....	.25	.75	2.50	60

EGG PLANT.

Sow the seed in hotbeds early in March, transplant to small pots and plunge them in the same beds; this is to make them strong and stocky. They should not be planted out until May or June, when the weather becomes warm and settled, as cool nights and wet weather will check their growth. Set the plants in rows 3 feet apart each way and give them thorough cultivation, drawing the earth up to the stems when they are about a foot high. Repeated sowings are sometimes necessary, as the seed does not germinate freely without strong and uniform heat. One oz. to 2,000 plants.

	Oz.	Days
Black Beauty .....	.50	80
New York Improved Spineless .....	.50	83

ENDIVE.

This is an important fall and winter salad. For early, the seed should be shown in April, in drills 15 inches apart, and the seedlings thinned to stand 12 inches apart in the rows. Sowings for the main crop may be made in June and July, as the vegetable is used principally in fall and winter. The inner leaves are blanched by tying the tips of the outer ones together, or by laying boards over the plants. One-fourth oz. to 100 feet of drill.

	Oz.	¼ lb.	Days
Broad Leaf Batavian .....	.25	.75	92
Thick, slightly wrinkled; forming a loose head.			
Green Curled .....	.25	.75	95
White Curled .....	.25	.75	100

KALE.

One oz. to 2,000 plants; 1 pound to the acre.

	Oz.	¼ lb.	Lb.	Days

Improved Siberian, deep green, large frilled leaves.....	.25	.60	1.75	65
Tall Curled Scotch, light green, deep leaves .....	.25	.60	1.75	60

KOHL RABI.

Very palatable when prepared for the table like turnips. If the weather is favorable the seed should be sown in April, in rows 18 inches apart, and the seedlings thinned to stand a foot apart. One-half oz. to 100 feet of drill.

	Oz.	Days
Early Purple Vienna .....	.50	62
Early White Vienna .....	.50	55

## LEEK.

Used for seasoning soups and boiling with meats. The seed should be sown in hotbeds in early spring, and the seedlings transplanted later to the open ground, 8 inches apart, in rows from 12 to 15 inches apart. One-half oz. to 100 feet of drill.

	Oz.
Broad Scotch or London Flag .....	.50

## LETTUCE.

Seed for the first outdoor crop is usually sown in hotbeds in February, and the seedlings transplanted to the garden in April, 8 to 12 inches apart, in rows 12 inches apart. For a succession until frost, sow in drills in the open ground at intervals of every two or three weeks, and thin the plants to stand 6 to 8 inches apart. For plants to force in hotbeds from November until spring, sow seed in hotbeds in the fall, and cover up as winter approaches, until the plants are required for use. Or the seed may be sown in hotbeds early in winter and the seedlings transplanted when large enough into fine and well-prepared garden soil. One-fourth oz. to 100 feet of drill; 2 pounds to the acre.

	Oz.	¼ lb.	Lb.	Days
Bibb .....	.25	.75	4.00	54
Big Boston, medium head, green tinted with red.....	.25	.75	3.00	75
Black Seeded Simpson, large frilled leaf, yellow-green.....	.25	.75	2.00	46
Stands heat well.				
Early Curled Simpson, large leaf, yellowish-green.....	.25	.75	2.00	45
Good for forcing and out doors.				
Grand Rapids, large curley leaf, light green .....	.25	.75	2.00	43
Extra fine for forcing.				
Hanson, large head, yellowish-green .....	.25	.75	3.00	80
Stands drought and hot sun well.				
Iceberg, large head, light green .....	.25	.75	3.00	84
The hardest heading variety of all.				
Paris White Cos, Trianon or Romain, dark green for poultry..	.25	.75	2.00	66
Prize Head, light green leaf, red edge.....	.25	.75	2.00	47
Leaves frilled and blistered; very crisp.				
N. Y. or Wonderful .....	.25	.75	3.00	80
A large late sort, cabbage heading variety, with large crumpled, dark green leaves. Similar to N. Y. cabbage.				
Oak Leaf .....	.25	.75	4.00	85

## MUSHROOM SPAWN.

American Pure Culture Spawn .....	1 lb. Brick	.50
-----------------------------------	-------------	-----

## MUSKMELON.

Muskmelon seed should not be planted outdoors until the ground has become warm and dry. The hills should be about 6 feet apart, and carefully prepared. Rich earth is far better for the young plants than manure; but if the latter must be used see that it is well rotted. Plant from six to twelve seeds in a hill, and when the young seedlings are strong enough to resist the attacks of insects, thin them, leaving three of the strongest in each hill. One oz. to 50 hills: 1 to 2 pounds per acre.

	Oz.	¼ lb.	Lb.	Days

## MUSTARD.

The young and tender leaves of the mustard are greatly relished as salads or when cooked like spinach. The seed should be sown in shallow drills as early as the ground can be prepared in spring. One oz. to 50 feet of drill.

	Oz.	¼ lb.	Lb.	Days
Fordhook, bright green fringed leaf .....	.10	.35	1.25	60
Mustard Spinach .....	.10	.35	1.25	45
A Japanese plant of the Mustard family which has become popular with the gardeners for its extremely quick habit of growth, producing a marketable crop of excellent mild mustard greens in about four weeks from seed.				
Ostrich Plume, light green fringed leaf .....	.10	.25	.75	60
Southern Giant Curled, light green heavy leaf.....	.10	.25	.75	40
White, for seasoning .....	.10	.25	.75	

OKRA.

The tender young pods are used for seasoning soups and stews. Sow the seeds thickly in rich soil about the middle of May, in drills 3 feet apart, and cover the seeds an inch deep. Two oz. to 100 feet of drill.

	Oz.	¼ lb.	Days
Dwarf Green, deep green pods .....	.10	.25	50
Perkin's Mammoth Green, deep green pods, tall .....	.10	.25	56
White Velvet, white pods, early .....	.10	.25	60

ONION.

Onions thrive best on a rich, deep, loamy soil. For sets, the seeds should be sown very thickly in drills as early as possible in spring. In summer, as soon as the tops die down, harvest the bulbs and store them in a dry, cool place, spreading them in thin layers. Early in the following spring replant them 4 inches apart, in small drills 12 inches apart, and they will form into fine, large bulbs early in the season. Large Onions may also be grown from seed the first season if the land is strong and well manured, the seed sown thinly in drills a foot apart, and the seedlings thinned to stand 3 or 4 inches apart in drills; they must be well cultivated and kept free from weeds. Five pounds per acre will be required for large onions; for sets, 25 to 30 pounds.

One-half oz. to 100 feet of drill.

	Oz.	¼ lb.	Lb.	Days
Extra Large Red Wethersfield, medium large, flat.....	.50	1.50	4.50	100
Mammoth Prizetaker, Yellow, large globe .....	.50	1.50	4.50	105
Southport Large White Globe .....	.50	1.50	4.50	110
Southport Large Red Globe .....	.50	1.50	4.50	110
Sweet Spanish, White, large round .....	.50	1.50	4.50	110

Yellow Bermuda, medium, flat .....	.50	1.50	4.50	93
Yellow Globe Danvers .....	.50	1.50	4.50	100

PARSLEY.

Much used for garnishing and flavoring soups, stews, etc. The seed is slow to germinate, and should be sown as early as possible, in drills 12 inches apart, thinning plants in rows 4 to 6 inches apart. One-half oz. to 100 feet of drill.

	Oz.	Days
Green Curled .....	.25	85
Moss Curled. Finely cut and curled for garnishing.....	.25	70
Plain, for flavoring .....	.25	72

PARSNIP.

Sow the seed in drills 15 inches apart as early as possible in spring, and thin the plants until they are 5 or 6 inches apart in the rows. The roots are much improved by frost; to be dug up as required. On the approach of cold weather, cover them heavily with manure or litter. Deep, rich, heavy soil is best suited to the culture of Parsnips, and the roots will be smooth and large if no fresh manure is used, as this tends to make them coarse-grained and misshapen. One-half oz. to 50 feet of drill; 8 pounds to the acre.

	Oz.	¼ lb.	Lb.	Days
Large Hollow Crown Sugar .....	.25	.50	1.00	95

PEAS.

Postage to be Paid by Purchaser. See Parcel Post Rates on Front Page.

Peas succeed in light, dry, loamy soil. Early and dwarf sorts require richer soil than the late varieties. If manure is used let it be old and well rotted, or there will be a rank growth of vines with few pods. Sow the early, smooth, round sorts as early in spring as the ground can be worked. Seeds of wrinkled varieties are more liable to rot if the ground is cold and must be planted later. Sow all the varieties quite early and depend for succession upon the different times of ripening of the various sorts, or from the first sowing sow every two weeks until June for a succession. One-half pound to 100 feet; 2 bushels to the acre.

	Lb.	¼ Bu.	Bu.	Days

Sunnybrook ..... A tomato-shaped sweet, red pepper of much merit. Fruit smooth, upright, 3 in. in diameter by 2½ in. in depth with thick flesh; moderately early.	.50	1.50	73
Sweet Golden Queen, 3 lobed, mild and sweet .....	.50	1.50	78
Sweet Mountain ..... Large; square shaped and mild.	.50	1.50	73
Worldbeater, 4 lobed, mild and sweet .....	.50	1.50	75

POP CORN.

	Lb.	Days
Golden Queen, large eared, 12-16 rowed .....	.25	90
Japanese Hulless, short eared, 18 rowed, white .....	.25	85
South American, large eared, 12-14 rowed, yellow.....	.25	90
White Rice, medium eared, 10-16 rowed .....	.25	90

PUMPKIN.

Grown principally for stock-feeding, yet some are so sweet, juicy and fine-grained that they will always be considered indispensable for pies and sauces. The vines require the same culture as that recommended for melons, but the seeds must be planted in hills much wider apart; frequently they are planted among corn. A pound of seed will plant from 200 to 300 hills. One to two pounds to the acre.

	Oz.	¼ lb.	Lb.	Days
Cushaw, Golden .....	.10	.25	.75	112
Similar to White Cushaw, except in color of shell, which is golden yellow.				
Cushaw, Striped .....	.10	.25	.75	112
Of the crookneck type with mottled green and white stripes; flesh yellow, very solid and fine grained.				
Cushaw, White .....	.10	.25	.75	110
Long, white, crookneck; fine for table or stock.				
Japanese Pie, crookneck, flesh deep yellow .....	.10	.25	.75	110
Small Sugar, round fruit, bright orange color .....	.10	.25	.75	108
Sweet Cheese or Kentucky Field, round fruit, deep yellow color .....	.10	.25	.50	120

RADISH.

Sow in sheltered spot, the earth being deeply dug, highly fertilized, and raked free from clods and stones. Radishes grown on poor, thin soil cannot be made good; they will be misshapen and tough. To be good they must be grown quickly. Radishes can be forced by covering with a window or a sash. One oz. to 100 feet of drill; 10 to 15 pounds per acre.

	Oz.	¼ lb.	Lb.	Days
Celestial, or White Chinese .....	.10	.30	.75	60
Best for fall; very large white radish. Round root.

Round Black Spanish Winter, white flesh .....	.10	.30	.75	56
Scarlet Globe .....	.10	.25	.75	24
Fine for forcing and open ground; very early. Round root.				
White Strasburg, long white root .....	.10	.25	.75	39

RHUBARB.

Sow the seed early, and when the plants are large enough thin them to 4 or 5 inches apart. The next spring or fall transplant them 3 feet apart each way in deep, rich soil. For forcing, take up some large roots and place them in a dark corner of the cellar or greenhouse. Two oz. to 100 feet of drill.

	Oz.	¼ lb.
Victoria .....	.25	.75

SALSIFY, OR OYSTER PLANT.

When cooked, the roots have something of the flavor and odor of oysters. They may be boiled, used in soups, or grated and fried as fritters. Culture the same as for parsnips and carrots. Roots are perfectly hardy, and may be left in the ground all winter. A quantity of roots for winter use may be stored in a pit or in sand or damp earth in a cellar. One oz. to 100 feet of drill.

	Oz.	¼ lb.
Mammoth Sandwich Island .....	.50	1.25

SPINACH.

One of the most important crops grown for greens, and may be had in good condition from very early in the spring until cold weather. For early use sow very early in spring, and for succession at intervals. The main crop for spring and winter use should be sown in September and the plants covered for winter.

One-half oz. to 100 feet of drill: 6 to 8 pounds to the acre.

	Oz.	¼ lb.	Lb.	Days
Bloodsdales Savoy, large crumpled dark green leaves.....	.10	.35	1.00	42
Long Standing, large crumpled dark green leaves.....	.10	.35	1.00	42
New Zealand, small thick dark green leaves .....	.25	.75	2.00	70

SQUASH.

Seeds should not be planted in spring until all danger of frost is past. Plant in hills 5 feet apart for bush varieties and 6 to 8 feet apart for running sorts, putting 6 to 8 seeds to the hill, finally leaving but 3 plants.

One-half pound to 200 or 300 hills; 2 to 3 pounds per acre.

	Oz.	¼ lb.	Days
Acorn, vine, Fall type .....	.15	.35	100
Banana Squash, vine, Fall type .....	.15	.35	105

Zucchini, bush, Summer type .....	.15	.35	62

SWISS CHARD, SILVER OR SEA KALE.

	Oz.	¼ lb.	Lb.	Days
Grown exclusively for its leaves, which can be used and served like Spinach. Cultivation same as Beets.....	.25	.75	2.00	50
Rhubarb Chard .....	.25	.75	3.00	60

TOBACCO

Sow the seed in plant bed in March. Transplant when five or six leaves appear. Set in rows 3½ feet apart, 18 to 20 inches apart in the row, according to variety. When the bud appears, break off the top, leaving 16 leaves to mature. Keep off all suckers growing from the stem. When the leaves have become waxy and brittle it is ripe. Cut and hang the stock in a shed to dry.

	Oz.
Connecticut Seed Leaf .....	.50
Well-Known Variety.	
White Burley .....	.50
Havana .....	.50

TOMATO.

As the plants advance in growth support them by brushwood. To have the Tomato very early it is necessary to start the plants in a hotbed, or they may be reared in a flower pot in a window and subsequently transplanted. Plants for an early crop should be raised under glass. For intermediate crop they may be raised on outside beds. For late crops the seed may be planted in permanent position.

One oz. to 2,500 plants; 2 ozs. to the acre.

	Oz.	¼ lb.	Days
Bonny Best, A good forcing variety .....	.50	1.50	73

The Stone ..... Very large and smooth; ripens evenly bright scarlet.	.50	1.50	92
Yellow Pear .....	.50	1.50	73

TURNIP.

For early, sow as soon as the ground can be prepared, in drills 15 inches apart, and thin the plants to stand 8 inches apart. Sow for succession at intervals of two weeks until the last week in July, and from that time onward until the last of August sow for main crop. The sowings should always be made just before a rain, if possible, as the success of the crop depends, in a great measure, upon quick germination and rapid growth of the young plants. One oz. to 300 feet of drill; 1 pound to the acre.

Red Top White Globe, round .....	.10	.35	1.00	57
Seven Top, grown for greens .....	.10	.35	1.00	

WATERMELON.

Secure good strong vines early in the season by making the hills large, mellow and well drained, with the manure placed so that they will not dry out quickly under hot suns. All possible protection from insects should be given the young plants, and as protection from insects, use dry ashes or coal dust sprinkled over the leaves. Plant the seeds thickly, and thin the plants to four of the strongest in each hill.
